Lessons from  
History of Education

The selected works of  
RICHARD ALDRICH

RICHARD ALDRICH

world library of **EDUCATIONALISTS**

In the World Library of Educationalists, international scholars themselves compile career-long collections of what they judge to be their finest pieces – extracts from books, key articles, salient research findings, major theoretical and practical contributions – so the world can read them in a single manageable volume. Readers will be able to follow the themes and strands and see how their work contributes to the development of the field.

Richard Aldrich has spent the last 30 years researching, thinking and writing about some of the key and enduring issues in history of education. He has contributed over 15 books and 75 articles to the field.

In *Lessons from History of Education*, Richard Aldrich brings together 14 of his key writings in one place. Starting with a specially written Introduction, which gives an overview of his career and contextualises his selection, the chapters cover:

- understanding history of education
- the politics of education
- educational reformers
- curriculum and standards
- the teaching of history
- education otherwise.

This book not only shows how Richard Aldrich's thinking developed during his long and distinguished career; it also gives an insight into the development of the fields to which he contributed.

### Contents

#### Introduction
